The total fall from 1st January to 23rd April 1904		5·53
The average fall of the corresponding period for 24 years, Surveyor-General's Office		4·03

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

dew.

N.B.—In the week's report from 20th to 26th March 1904 read 29·789 for 29·879 as the average pressure of the corresponding period for 24 years, Surveyor-General's Office.

No. 20.—Notification.—It is hereby notified for general information that the Lieutenant-Governor of Bengal proposes, under the provisions of sections XI and XII of Act V (B.C.) of 1864, to pass the following rules in modification of those now in force on the Calcutta Canals and Tolly's Nala with effect from 1st July 1904.

D. B. HORN,
Secy. to the Govt. of Bengal.

Revised Rules for the Calcutta Canals and Tolly's Nala.

The rules shall apply to the following navigable channels which are included under the designation "Calcutta Canals and Tolly's Nala":—

I.—The Circular Canal comprising the still-water canal between the Dhappa and Chitpur Locks and the New Cut Canal from Ultadingi to Dhappa Lock, together with its junction with the river Hooghly and the Orange Soorah at Dhappa.

II.—The Central Lake Channel from its junction with the Circular Canal at the Dhappa Lock to its junction with the Biddiadharee at Bamunghatta.

III.—The Nowbhanga khal, extending northwards for a mile from its junction with the Central Lake Channel below the Dhappa Lock.

IV.—The Soorah from its junction with the Central Lake Channel below the Dhappa Lock and extending to the fish market situated adjacent to, and to the west of, the Dhappa Inspector's residence.

V.—Tolly's Nala extending from a line drawn across the Nala 25 feet west of the Hastings Bridge at Kidderpore to the Biddiadharee river at Samookpota.

1. Every vessel on entering the Calcutta Canals or Tolly's Nala shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, the persons appointed by the Lieutenant-Governor to collect tolls and officers to whom such persons are subordinate shall have authority to again measure a vessel notwithstanding that it was measured on entering the canals.

2. Vessels for the purposes of the determination of tonnage shall be divided into two classes as below:—

Class I.—To include all vessels of the usual native types of build.

Class II.—To include all steamers, flats and barges, and other square built boats.

The net tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V (B.C.) of 1864 and of these rules, be determined by the following measurements:—

Class I.—

A.—The product of one quarter the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length is to be made in feet, rejecting inches; the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of boats exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—Provided that in the case of vessels which enter the canals at Chitpore, Kidderpore and Chetla empty, for the purpose of loading therein, the depth shall be measured from the line of usual immersion when fully loaded as visible on the outside of the vessel to the bottom (interior) of the vessel, and not from the line of actual immersion at the time of measurement.

Class II.—

For vessels of Class II the number of maunds obtained by the system of measurement prescribed for vessels of Class I, shall be increased by one-half. For vessels of this class above 5,000 maunds measurement the maundage shall be reckoned to the nearest integral multiple of 500 maunds rejecting any remainder of less than 500 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of Class II which are furnished with reliable way-bills the gross maundage of cargo shown by the way-bills may at the option of the employer of the vessel be taken as the maundage on which toll will be charged. Provided that firms or individuals who wish to make use of this rule, must be approved by the Superintending Engineer of the South-Western Circle, and that such approval may be withdrawn for any just cause.

3. Every vessel entering the canals shall be furnished with a ticket on which the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage of the vessel, the cargo it contains, the amount of toll charged, and the number of days for which the ticket remains current, shall be entered.

4. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognised standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

5. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rule 2 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section IX of the Act.

6. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of one rupee. Provided that for tickets on which the total tollage is less than four rupees, the fee to be charged for a duplicate shall be one quarter of the total tollage.

7. A vessel which has been detained under these rules or under section IX of the Act, may not be removed from the canal without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjee, owner, or agent must make arrangements for the safety of the vessel and cargo.

8. All vessels, whether the property of Government or of private owners, are liable for toll except those exempted by the provisions of Bengal Government Notification No. 261, dated the 21st July 1890.

9. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor appointed by the Lieutenant-Governor, under section XIII. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

10. At places where mooring posts have been provided by the Supervisor, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor may direct and shall not be moored in any other manner.

11. The Supervisor may by written notice to be posted at the Toll Offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the Canals or on the banks.

12. Boats shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor, and no boat shall be made fast or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety, or obstruct the passage, of other boats.

13. Boats passing through the canals shall keep in separate lines, empty boats keeping close to the bank and those that are laden in the centre.

14. In portions of the canals where only one towing path exists, vessels shall moor on the side opposite to the towing path, and the towing path side shall always be kept clear.

15. Iron built cargo boats, with outside angle irons projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the lock.

16. No fire, or open or unprotected light of any description, shall be used on boats containing petroleum, jute, hay or straw while in the Calcutta Canals or Tolly's Nala; and

no fire or open or unprotected light (except in the case of steamers, the galley and engine-room fires and the electric light) shall be used on any vessel while in a lock basin.

17. No person shall wilfully or negligently allow a vessel to sink in the canals.

18. In every case of a sunken vessel whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

If three days after the occurrence of a wreck, it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner.

19. When a sunken vessel has been recovered, the Supervisor shall cause notices to be posted at the locks, toll-offices, or other prominent places, calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, under the procedure directed in section IX of the Act.

20. The purchaser of a vessel sold under the provisions of section IX of the Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

21. When any laden vessel which has sunk, has been recovered; or, when any laden vessel has been seized under the provisions of the Act, or of these rules, the Supervisor shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay, and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

22. If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in Rule 21 shall be effected by a notice exhibited in his office, and by advertisement in at least one English and one vernacular Calcutta newspaper.

23. Steamers are not allowed to tow flats or cargo boats in the Circular Canal, but may tow one flat or barge at a time astern in the New Cut Canal.

24. *Lights and signals.*—All vessels, whether travelling or moored in the Calcutta Canals or Tolly's Nala, must, between sunset and sunrise, carry a white light in a lantern on the fore-part of the vessel where it can be distinctly seen from all sides. All steam vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam vessel, whether in motion or moored, shall carry the light prescribed above.

25. *Speed of vessels.*—Every vessel proceeding through the Calcutta Canals and Tolly's Nala must, between sunset and sunrise, limit her speed to three miles per hour.

26. For any contravention of Rules 7, 11, 12, 13, 14, 16, 17, 23, 24, and 25 the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 or Rs. 5 a day for any continuing infringement.

27. No boats will be allowed to remain between the Dwarf walls of the entrance channels to the Dhappa and Chitpur Locks.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

No. 20.—Notification.—It is hereby notified for general information that the Lieutenant-Governor of Bengal proposes, under the provisions of sections XI and XII of Act V (B.C.) of 1864, to pass the following rules in modification of those now in force on the Calcutta Canals and Tolly's Nala with effect from 1st July 1904.

D. B. HORN,
Secy. to the Govt. of Bengal.

Revised Rules for the Calcutta Canals and Tolly's Nala.

The rules shall apply to the following navigable channels which are included under the designation "Calcutta Canals and Tolly's Nala":—

I.—The Circular Canal comprising the still-water canal between the Dhappa and Chitpur Locks and the New Cut Canal from Ultadingi to Dhappa Lock, together with its junction with the river Hooghly and the Orange Soorah at Dhappa.

II.—The Central Lake Channel from its junction with the Circular Canal at the Dhappa Lock to its junction with the Biddiadharee at Bamunghatta.

III.—The Nowbhanga khal, extending northwards for a mile from its junction with the Central Lake Channel below the Dhappa Lock.

IV.—The Soorah from its junction with the Central Lake Channel below the Dhappa Lock and extending to the fish market situated adjacent to, and to the west of, the Dhappa Inspector's residence.

V.—Tolly's Nala extending from a line drawn across the Nala 25 feet west of the Hastings Bridge at Kidderpore to the Biddiadharee river at Samookpota.

1. Every vessel on entering the Calcutta Canals or Tolly's Nala shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, the persons appointed by the Lieutenant-Governor to collect tolls and officers to whom such persons are subordinate shall have authority to again measure a vessel notwithstanding that it was measured on entering the canals.

2. Vessels for the purposes of the determination of tonnage shall be divided into two classes as below:—

Class I.—To include all vessels of the usual native types of build.

Class II.—To include all steamers, flats and barges, and other square built boats.

The net tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V (B.C.) of 1864 and of these rules, be determined by the following measurements:—

Class I.—

A.—The product of one quarter the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length is to be made in feet, rejecting inches; the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of boats exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—Provided that in the case of vessels which enter the canals at Chitpore, Kidderpore and Chetla empty, for the purpose of loading therein, the depth shall be measured from the line of usual immersion when fully loaded as visible on the outside of the vessel to the bottom (interior) of the vessel, and not from the line of actual immersion at the time of measurement.

Class II.—

For vessels of Class II the number of maunds obtained by the system of measurement prescribed for vessels of Class I, shall be increased by one-half. For vessels of this class above 5,000 maunds measurement the maundage shall be reckoned to the nearest integral multiple of 500 maunds rejecting any remainder of less than 500 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of Class II which are furnished with reliable way-bills the gross maundage of cargo shown by the way-bills may at the option of the employer of the vessel be taken as the maundage on which toll will be charged. Provided that firms or individuals who wish to make use of this rule, must be approved by the Superintending Engineer of the South-Western Circle, and that such approval may be withdrawn for any just cause.

3. Every vessel entering the canals shall be furnished with a ticket on which the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage of the vessel, the cargo it contains, the amount of toll charged, and the number of days for which the ticket remains current, shall be entered.

4. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognised standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

5. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rule 2 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section IX of the Act.

6. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of one rupee. Provided that for tickets on which the total tollage is less than four rupees, the fee to be charged for a duplicate shall be one quarter of the total tollage.

7. A vessel which has been detained under these rules or under section IX of the Act, may not be removed from the canal without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjee, owner, or agent must make arrangements for the safety of the vessel and cargo.

8. All vessels, whether the property of Government or of private owners, are liable for toll except those exempted by the provisions of Bengal Government Notification No. 261, dated the 21st July 1890.

9. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor appointed by the Lieutenant-Governor, under section XIII. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

10. At places where mooring posts have been provided by the Supervisor, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor may direct and shall not be moored in any other manner.

11. The Supervisor may by written notice to be posted at the Toll Offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the Canals or on the banks.

12. Boats shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor, and no boat shall be made fast or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety, or obstruct the passage, of other boats.

13. Boats passing through the canals shall keep in separate lines, empty boats keeping close to the bank and those that are laden in the centre.

14. In portions of the canals where only one towing path exists, vessels shall moor on the side opposite to the towing path, and the towing path side shall always be kept clear.

15. Iron built cargo boats, with outside angle irons projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the deges of the angle-iron so as to prevent them from causing damage to the lock.

16. No fire, or open or unprotected light of any description, shall be used on boats containing petroleum, jute, hay or straw while in the Calcutta Canals or Tolly's Nala; and no fire or open or unprotected light (except in the case of steamers, the galley and engine-room fires and the electric light) shall be used on any vessel while in a lock basin.

17. No person shall wilfully or negligently allow a vessel to sink in the canals.

18. In every case of a sunken vessel whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

If three days after the occurrence of a wreck, it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner.

19. When a sunken vessel has been recovered, the Supervisor shall cause notices to be posted at the locks, toll-offices, or other prominent places, calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, under the procedure directed in section IX of the Act.

20. The purchaser of a vessel sold under the provisions of section IX of the Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

21. When any laden vessel which has sunk, has been recovered; or, when any laden vessel has been seized under the provisions of the Act, or of these rules, the Supervisor shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay, and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

22. If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in Rule 21 shall be effected by a notice exhibited in his office, and by advertisement in at least one English and one vernacular Calcutta newspaper.

23. Steamers are not allowed to tow flats or cargo boats in the Circular Canal, but may tow one flat or barge at a time astern in the New Cut Canal.

24. *Lights and signals.*—All vessels, whether travelling or moored in the Calcutta Canals or Tolly's Nala, must, between sunset and sunrise, carry a white light in a lantern on the fore-part of the vessel where it can be distinctly seen from all sides. All steam vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam vessel, whether in motion or moored, shall carry the light prescribed above.

25. *Speed of vessels.*—Every vessel proceeding through the Calcutta Canals and Tolly's Nala must, between sunset and sunrise, limit her speed to three miles per hour.

26. For any contravention of Rules 7, 11, 12, 13, 14, 16, 17, 23, 24, and 25 the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 or Rs. 5 a day for any continuing infringement.

27. No boats will be allowed to remain between the Dwarf walls of the entrance channels to the Dhappa and Chitpur Locks.

In exercise of the power conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following additional rules to regulate the granting of licenses to possess dangerous petroleum (otherwise than in bulk) in or near the town of Calcutta, and to direct that they be inserted after rule 4 in the rules published under Notification No. 24 (Marine), dated the 15th March, 1901:—

"4A. Notwithstanding anything in rules 3 and 4, licenses for the possession of dangerous petroleum (otherwise than in bulk) within or near the town of Calcutta shall not be granted unless the following special conditions are imposed, namely:—

(*a*) the quantity of petroleum covered by a license shall not exceed 3,000 gallons;

(*b*) the building in which the petroleum is to be stored must be constructed of masonry, with a terraced, tiled or iron roof, and with a tiled, paved or earthen floor;

(*c*) the doorways and other openings of such building must be built up to such a height above the level of the road or street, or the floor of such building must be sunk to such a depth below the level of the road or street, that the petroleum stored in it cannot flow out from the building in case of its escape from the receptacles in which it is contained; *or* the building itself must be surrounded with a masonry wall sufficiently high to contain all the petroleum stored in the building in case of its escape from the building; *or* a combination of these methods may be adopted;

(*d*) there must be a clear open space of at least 150 feet round such building;

(*e*) the drums or other receptacles in which the petroleum is contained must fulfil the following conditions, namely:—

(*i*) they must be of gas-tight iron or steel, of at least $\frac{1}{8}$th of an inch in thickness, containing not more than 10 gallons and fitted with well-made filling holes and well-fitting screw plugs, *or* of gas-tight tinned sheet-iron, containing not more than 10 gallons, and fitted with screw caps with metal air-tight under caps or fitted with well-fitting screw plugs, and, if of the latter description, they must be packed in strong wooden cases, the thickness of the wood to be not less than $\frac{1}{2}$ an inch;

(*ii*) they must be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure in transit;

(*iii*) the nature of the contents, and also the words "highly inflammable," must be distinctly marked on each; and

(*iv*) an air space of at least $\frac{1}{10}$th its capacity must be left in each drum or other receptacle at the time of filling.

(*f*) no smoking, or light or fire of any description, shall be permitted at any time within or near any building licensed under this rule;

(*g*) no drum or other receptacle containing dangerous petroleum shall be opened, or the petroleum drawn off, within or near any building licensed under this rule.

"4B. Nothing in these rules shall affect the rules relating to the grant of licenses to possess dangerous petroleum for use in motor cars or cycles."

Directions for crossing the bar.

No. 144 (first publication).—The Portmaster, Brisbane, has given notice (No. 6 of 1904) that, when crossing the Wide Bay Bar, the Square Beacons must now be kept open twice their own to the northward, keeping them so until the Inskip Lead is also open the same distance to the westward, then proceed as before. Vessels may borrow slightly to the north and west of these lines.

Owing to the recent bad weather experienced the Bar has again commenced to shift in a northerly direction, and mariners are requested to exercise the utmost caution when using the Bar.

Charts affected, Nos. 1030 and 1068; Australia Directory, Vol. II.

JAPAN—NAIKAI (INLAND SEA)—HIROSHIMA BAY.

Yakataishi rock—Light established.

No. 145 (first publication).—The British Admiralty has given notice (No. 247 of 1904) that, on 15th February 1904, a *white fixed* light, elevated 19 feet above high water, and visible in clear weather from a distance of 8 miles, was established on the stone conical beacon,

painted red, erected on a rock named Yakataishi near the northern extremity of Yeda sima. The light is unwatched, and has a light power of 80 candles.

Approximate position, lat. 34° 17¾′ N., long. 132° 29′ E.

This Notice affects the following Admiralty Chart:—Naikai, No. 2875: Also, List of Lights, part VI, 1904, No. 918a; and Sailing Directions for Japan, &c., 1903, page 486.

RED SEA, WESTERN SHORE—Asab bay.

Rubattino channel—Leading beacons removed.

No. 146 (first publication).—The British Admiralty has given notice (No. 249 of 1904) that, in consequence of the alteration which has taken place in the depths in Rubattino channel, Asab bay, the leading beacons erected on the small islet between Huiheb and Haleb islands have been removed.

Approximate position, lat. 12° 57½′ N., long. 42° 54′ E.

This Notice affects the following Admiralty Chart:—Plan of port Asab on Chart of Red sea, No. 8e; and Chart No. 143, Jebel Teir to Perim island: Also, Red Sea, etc., Pilot, 1900, page 228.

PACIFIC OCEAN, SOUTH—Royal Company's islands.

Non-existence of, reported.

No. 147 (first publication).—The British Admiralty has given notice (No. 252 of 1904) that on old Charts of the South Pacific ocean, in the area south of Australia, a group of islands, named Royal Company's islands, are marked as existing in lat. 50° 20′ S., long. 143° 0′ E. They have consequently been inserted for many years in the Admiralty publications.

These islands are not mentioned in any Sailing Directions, the original report of their existence cannot be traced, nor have they apparently been seen by any passing vessel.

Since 1890 the Hydrographic Department of the Admiralty has been collecting data showing where ice and icebergs may be met with in the Southern oceans, and this has necessitated plotting the tracks of many vessels passing south of Australia, several of which have passed over, or close to, the position assigned to the Royal Company's islands without seeing them or any sign of land near them:—thus in 1892 the *Pakeha* passed one mile north of their assigned position; in 1893 the *Crusader* passed 5 miles north of them; in 1894 the *Rangatira* passed 15 miles north of them; in 1895 the *Maori* passed 2½ miles south, and the *Rangatira* 15 miles south of them; in 1899 the *Rangatira* passed one mile south of them, and the *Matatua* 2 miles north; in 1900 the *Matatua* passed over the position in which they are supposed to be situated; in 1901 the *Karamea* passed 40 miles south of them, and in 1902 the *Pakeha* passed 12 miles south of them.

As no certain information is available as to why these islands were originally placed on the Charts, and as it is evident from the tracks plotted that no land exists in the locality in which they are marked on the Charts, they have now been expunged from the Admiralty publications.

This Notice affects the following Admiralty Charts:—Atlantic and Indian oceans, etc., No. 2483; Pacific ocean, Nos. 2683 and 788.

AUSTRALIA, WEST—Geographe bay.

Cape Naturaliste—Light established.

No. 148 (first publication).—With reference to Notice to Mariners No. 356, dated 31st October 1903, issued by this office, the British Admiralty has given further Notice (No. 253 of 1904) that, on 15th April 1904, a *white group flashing* dioptric light showing groups of two flashes *every ten seconds*, thus:—flash, *one-tenth of a second*, eclipse, *two and six-tenths of a second*, flash, *one-tenth of a second*, eclipse, *seven and two-tenths of a second*, will be established in a grey stone tower, 62 feet high, constructed in a position about a mile S. 67° E. from the extremity of cape Naturaliste. The light will be elevated 404 feet above high water and visible in clear weather from a distance of 29 miles; it will be obscured over the land from the bearing of N. 20° E., through north, to N. 63° W.

Approximate position, lat. 33° 32′ S., long. 115° 2¾′ E.

(*Variation 4° Westerly in 1904.*)

This Notice affects the following Admiralty Charts:—Indian ocean, No. 748b; Australia, No. 2759b; Champion bay to cape Naturaliste, No. 1033; cape Naturaliste to King George sound, No. 1034: Also, List of Lights, part VI, 1904, No. 1071a; and Australia Directory, vol. III, 1895, page 395.

AFRICA, NORTH-EAST—Red sea, western shore.

Massawa channel—Intended alteration in lighting—Buoy.

No. 149 (first publication).—The British Admiralty has given notice (No. 254 of 1904) that it is intended to make the undermentioned alteration in the lighting of the Massawa channel :—

1. Difnein island. The white fixed light on this island will be replaced by a *white flashing* light *every five seconds*, with a *red* sector, exhibited from an iron tower 114 feet high.

   Approximate position, lat. 16° 37′ N., long. 39° 18½′ E.

2. Madote island. A *white fixed* light, visible from a distance of 10 miles, will be established on a framework support, 35 feet high, now being constructed on this island.

Dated Darjeeling, the 2nd May 1904.

RESOLUTION.

READ—

The Report on the Administration of the Jail Department for the year 1903.

Reports for the years 1901 and 1902 and the Resolutions of Government recorded thereon.

Major W. J. Buchanan, I.M.S., was in charge of the Jail Department from the 1st of January till the 17th of April 1903, from which latter date Major R. J. Macnamara, I.M.S., held charge until the end of the year under review. Major Macnamara has submitted the Report for the year.

2. The total population of the jails of Bengal, which amounted to 21,030 on the 1st of January 1903, was decreased by the release of 3,334 prisoners on

the occasion of the Coronation of the King-Emperor, but it rose steadily during the year, although admissions were fewer by over two thousand than those of the preceding year, and stood at 19,907 at the end of the year.

3. The health of the prisoners during the year 1903 was in general good; and the death-rate, which stood for all the jails at 23·5 per mille against a death-rate of 33·33 per mille for the whole population of Bengal, was lower than any rate recorded during the last ten years, except those for the years 1898 and 1899. To the generally satisfactory statistics of health of the jail population the returns of the Barisal Jail furnish a marked exception. As noticed in the Resolution on the report for the year 1902, this jail has for some years had a very bad record of mortality, and for the year 1903 it shows a ratio of 90·6 deaths per mille, which is in excess even of previous records, and which, even after allowing for the bad health of many of the prisoners on admission, is an alarming rate. The Lieutenant-Governor has required the Inspector-General to submit a special report as to the steps which have been taken during the past year and which are proposed to improve the health of the prisoners in this jail; and the Inspector-General has reported that the two main defects which have been factors in the excessive mortality have been, first, overcrowding and, secondly, bad water-supply. Not only has this jail been frequently overcrowded so far as regards accommodation in wards, but the jail is also "site crowded," *i.e.*, the area within the walls is insufficient. The water-supply for the jail has been taken sometimes from a reserved tank and sometimes from the river. The river supply is considered the better, and should alone be used. Sanction has recently been given to enlarge the enclosed area of the jail; a new hospital has been built, and it is hoped that a municipal water-supply for the town and jail will be arranged. It is quite clear, however, that the state of this jail requires the very close attention of the Inspector-General and the local officers. The Inspector-General is evidently in doubt whether all the causes of the present high mortality in this jail have been ascertained and whether they are removable. The Lieutenant-Governor has requested the Inspector-General of Civil Hospitals, in consultation with Major Buchanan, and if necessary with the Sanitary Commissioner and Sanitary Engineer, to conduct a careful inquiry into the causes of mortality in this jail.

4. In general it is to be noticed, as was noticed in last year's Resolution, that the accommodation available in Bengal jails and subsidiary jails is insufficient, and specially in the case of under-trial prisoners. The expenditure incurred during the year on jail buildings amounted to Rs. 3,03,306, namely, Rs. 2,52,116 on original works and Rs. 51,190 on repairs, and it is hoped that a larger sum will be spent under this head during the current year. The want of accommodation has led to the mixing up of convicts and under-trial prisoners in some jails, to overcrowding, and to the absence of suitable quarantine arrangements where plague is prevalent. The Lieutenant-Governor concurs with the Inspector-General in his view of the importance of this matter. The Inspector-General has furnished lists grouping the required works in order of urgency, and His Honour hopes that it may be possible to give effect to a programme of extension and improvement in the course of the next two or three years.

5. The Lieutenant-Governor has recently consulted the Inspector-General as to the feasibility of abolishing a large number of the subsidiary jails so far as regards the accommodation in them, even for short periods, of convicts. It is especially in the subsidiary jails that overcrowding is too common in the case of under-trial prisoners, and it is hoped that a change of system, so far as may be found possible, under which convicts will be sent immediately on sentence to the district or central jail, will give substantial relief in the accommodation of under-trial prisoners. Such a reform will also, it is hoped, result in more effective discipline and providing suitable labour for convicts. Difficulties will no doubt be found in giving full effect to this measure in the case of some of the subsidiary jails on account of their distance from head-quarters and because police escorts will not always be promptly forthcoming; but in the main it is believed that the reform contemplated is practicable and desirable, even when it may involve additional expenditure.

6. Major Macnamara has offered some interesting remarks on the subject of the rice diet which is in general use in Bengal jails, but the Lieutenant-Governor is not convinced of the soundness of his conclusion that prisoners are "largely overfed with rice." It is to be remembered that in the districts of Bengal Proper rice is the staple food of the people; and the substitution of *makai* or any other cereal in the jails of these districts might not be expedient. The instance given by the Officiating Inspector-General of a change in the health of the prisoners of the Daltonganj Jail, which was coincident with the partial substitution of *makai* for rice in the diet scale, is not conclusive, because in fact the inhabitants of the Palamau district largely eat *makai*. At the same time it undoubtedly illustrates the necessity for, or advantages of, careful attention to the matter of diet. On the whole, the figures relating to increase and decrease of weight of convicts which are given in an Appendix to the Report are not unsatisfactory. From this statement it appears that out of 42,329 convicts discharged during the year, 10,191 neither lost nor gained weight, 26,219 gained weight, and only 5,919 lost weight. The Lieutenant-Governor leaves it to Major Buchanan, who has returned to duty, to make such recommendations to Government as he may think proper on this important subject of diet of prisoners after consideration of the suggestions made by his *locum tenens*.

7. Under the head of Labour and Cash Earnings the Lieutenant-Governor notices that there was a satisfactory increase of average profit per head of those sentenced to labour from Rs. 30-12 in 1902 to Rs. 31-9 in 1903. The net earnings in central jails per head of average strength of convicts ranged from Rs. 116-1 in the Presidency Jail to only Rs. 10-1 in Rampur Boalia. The differences require the careful attention of Superintendents. The Inspector-General has been invited to place before Government, if he thinks proper, the purport of his correspondence with the Military authorities on the subject of the full use by them of the jail factories; and the Public Works Department will enquire into the complaint that convict labour was not employed fully on the construction and repairs of jail buildings in Hazaribagh.

8. There was a decrease in the total numbers of offences and punishments of convicts during the year, but a slight increase in the percentage of punishments to average number of convicts, which was apparently due to the number of releases of short-term prisoners in connection with the Coronation rejoicings. As suggested in last year's Resolution, a scheme of remission of sentences by days to take the place of the record of marks was submitted during the year by Major Macnamara, but its consideration was postponed till the return from leave of Major Buchanan, who originally proposed this change. The Lieutenant-Governor awaits Major Buchanan's opinion on the subject.

9. The Lieutenant-Governor again notices the unsatisfactory state of the jail warder force. It was suggested in last year's Resolution that the leave rules for these officers should be made more liberal with special reference to the fact that most of the warders come from up-country districts. It is understood, however, that the leave difficulties are principally due to the want of a reserve of warders, and the Lieutenant-Governor will be prepared to consider proposals for the necessary increase of strength to enable leave to be more freely given.

10. The average period of detention of under-trial prisoners, the Lieutenant-Governor regrets to observe, was in excess of the figures for the preceding year in spite of the smaller number of admissions. Enquiries must be made by Commissioners in the case of those jails and subsidiary jails which show the most unsatisfactory results; but this matter is one which demands constant attention from Commissioners and District Magistrates throughout the year. Inspections of subsidiary jails by the Subdivisional Officers were more regularly made than in the preceding year, but explanations will be required from the Subdivisional Officers of Cox's Bazar and Samastipur as to the insufficient number of visits paid by them to the subsidiary jails under their charge.

11. The Lieutenant-Governor notices commendations bestowed by the Officiating Inspector-General upon officers of the Department and thanks

Major Macnamara for the zeal with which he discharged his duties and for an interesting report.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Jails for information and guidance.

Ordered also that a copy of this Resolution and a copy of the Report be submitted to the Government of India in the Home Department.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

RECOMMENDATION TO BE MADE BY THE DISTRICT BOARDS OF THE DACCA DIVISION FOR THE NOMINATION OF A MEMBER TO THE BENGAL LEGISLATIVE COUNCIL.

No. 804A.—D.

RESOLUTION.

APPOINTMENT DEPARTMENT.

Dated Darjeeling, the 4th May 1904.

THE seat in the Bengal Legislative Council of the Hon'ble Maulvi Seraj-ul-Islam, Khan Bahadur, who was nominated as the representative of the District Boards of the Chittagong Division, will be vacant on the 28th July 1904. On the occurrence of the vacancy caused by the expiry on the 19th August 1903 of the term of office of the Hon'ble Babu Chaturbhooj Sahay, who represented the District Boards of the Patna Division, it became the turn of the District Boards of the Dacca Division, in the rotation sketched in paragraph 5 of the Resolution of this Government No. 1553J., dated the 25th March 1893, to exercise the privilege of recommending a candidate to fill the seat to be so vacated. For special reasons, however, which were set forth in the Resolution of this Government, No. 1194A.—D., dated the 1st June 1903, the Lieutenant-Governor decided to invite the District Boards of Chota Nagpur, instead of those of the Dacca Division, to submit a recommendation for filling the vacancy on that occasion. For the purposes of filling the vacancy which will occur on the expiry on the 28th July next of the Hon'ble Maulvi Seraj-ul-Islam Khan Bahadur's term of office, return will be made to the rotation laid down in the Resolution of 1893; and the District Boards of the Dacca Division will accordingly be invited to exercise the privilege of recommendation on this occasion. The necessary notification will be published in the *Calcutta Gazette*, specifying the District Boards of the Dacca Division as the group of Boards on whose recommendation the Lieutenant-Governor will make a nomination to the seat. Each District Board will elect one representative only, and he will be entitled to exercise all the votes of the body which he represents.

2. The following statement shows the District Boards which will send delegates to vote for a person to be recommended for the vacant seat, and the number of votes assigned to them according to the scale shown in paragraph 5 of the Resolution of this Government No. 2307A., dated the 31st March 1897.

The ordinary income taken is that for 1902-1903:—

Division.	District Board.	Ordinary income.	Number of votes to be recorded by the representatives.
		Rs.	
Dacca ...	Dacca ...	1,55,207	3
	Mymensingh ...	2,95,889	6
	Faridpur ...	95,729	2
	Backergunge ...	2,66,667	5

3. Under Rule IV of the Regulations framed by the Governor-General in Council with the approval of the Secretary of State under section 1 (4) of the Indian Councils Act, 1892, for Bengal, the Lieutenant-Governor now desires that the Commissioner of the Dacca Division will at once address the Chair-men of the District Boards enumerated in the above list, requesting them to convene a special meeting of their Board at which one member of the Board should be selected to represent them for the purpose of making the recommendation for the seat in Council. The name of the representative so selected must be reported at once by the Chairman to the Commissioner of the Division.

4. The period of three months laid down in Rule VII of the Regulations as that within which a recommendation shall be made to the Lieutenant-Governor will run from the date on which the Commissioner of the Division issues his request to the Chairmen of the District Boards.

5. As soon as the representatives have been selected, they will be called upon by the Commissioner of the Division to meet together on an early and convenient date, with special reference to the limit of time imposed by Rule VII of the Regulations, and at such convenient place as he may specify, for the purpose of electing, by a majority of votes, a person whom they will recommend to the Lieutenant-Governor to be nominated as a member of the Council. The names of all candidates put forward at such meeting shall be duly proposed by one of the representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on the occasion of the first ballot an absolute majority is not obtained, the name of the candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates, and so on, until an absolute majority is obtained. In the event of a tie occurring at any stage, lots shall be drawn.

6. The electoral representatives present at this meeting shall elect one of themselves to be Chairman, and he shall preside and be responsible for the fair and proper exercise of the ballot vote.

7. The Chairman of the meeting shall without delay report to the Commissioner of the Division the name of the person elected, with the number of votes obtained, and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor the nomination to the Council of the person so elected. The Commissioner shall submit the report from the Chairman of the meeting, with any observations he may wish to add, to the Chief Secretary to Government, by whom the recommendation will be submitted to the Lieutenant-Governor.

8. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council with the approval of the Secretary of State:—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation, or group of Municipal Corporations, that he shall be a person resident within the Municipality or the district in which it is situated, or in some one of the municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

Explanation.—A person is not "resident" within the meaning of this rule unless he has a place of residence in the locality concerned, and such practical connection with that locality as qualifies him to represent the inhabitants thereof.

If at any time the question is raised whether a person proposed for election is "resident" within the meaning of this rule, the question shall be referred to, and decided by, the Local Government, whose decision shall be final.

Under this rule it is not necessary that the person recommended should be a member of any District Board concerned, but he must be resident within the Division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the representatives to recommend a person under Rule V (*c*) according to the majority of their votes.

9. It is desirable that the subsidiary arrangements now sanctioned shall, as far as possible, be given effect to by the District Boards concerned with the minimum of official interference. The Divisional Commissioner and the District Magistrates will, of course, afford any assistance which may be required, and will do their utmost to facilitate the smooth working of the elections; but Government officers are forbidden to take part, directly or indirectly, in the election by canvassing, influencing votes, or otherwise interfering with the free choice of the District Boards. No indication should be given by any official member of any of the District Boards concerned as to the manner in which he himself intends to vote.

ORDERED that a copy of this Resolution be furnished to the Commissioner of the Dacca Division for information and guidance, and for communication to the District Boards in his Division.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Chief Secy. to the Govt. of Bengal.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning, / strong wind; K, thunderstorm.

[Sixth Publication.]

No. 20.—Notification.—It is hereby notified for general information that the Lieutenant-Governor of Bengal proposes, under the provisions of sections XI and XII of Act V (B.C.) of 1864, to pass the following rules in modification of those now in force on the Calcutta Canals and Tolly's Nala with effect from 1st July 1904.

D. B. HORN,
Secy. to the Govt. of Bengal.

Revised Rules for the Calcutta Canals and Tolly's Nala.

The rules shall apply to the following navigable channels which are included under the designation "Calcutta Canals and Tolly's Nala":—

I.—The Circular Canal comprising the still-water canal between the Dhappa and Chitpur Locks and the New Cut Canal from Ultadingi to Dhappa Lock, together with its junction with the river Hooghly and the Orange Soorah at Dhappa.

II.—The Central Lake Channel from its junction with the Circular Canal at the Dhappa Lock to its junction with the Biddiadharee at Bamunghatta.

III.—The Nowbhanga khal, extending northwards for a mile from its junction with the Central Lake Channel below the Dhappa Lock.

IV.—The Soorah from its junction with the Central Lake Channel below the Dhappa Lock and extending to the fish market situated adjacent to, and to the west of, the Dhappa Inspector's residence.

V.—Tolly's Nala extending from a line drawn across the Nala 25 feet west of the Hastings Bridge at Kidderpore to the Biddiadharee river at Samookpota.

1. Every vessel on entering the Calcutta Canals or Tolly's Nala shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, the persons appointed by the Lieutenant-Governor to collect tolls and officers to whom such persons are subordinate shall have authority to again measure a vessel notwithstanding that it was measured on entering the canals.

2. Vessels for the purposes of the determination of tonnage shall be divided into two classes as below:—

Class I.—To include all vessels of the usual native types of build.

Class II.—To include all steamers, flats and barges, and other square built boats.

The net tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V (B.C.) of 1864 and of these rules, be determined by the following measurements:—

Class I.—

A.—The product of one quarter the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length is to be made in feet, rejecting inches; the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of boats exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—Provided that in the case of vessels which enter the canals at Chitpore, Kidderpore and Chetla empty, for the purpose of loading therein, the depth shall be measured from the line of usual immersion when fully loaded as visible on the outside of the vessel to the bottom (interior) of the vessel, and not from the line of actual immersion at the time of measurement.

Class II.—

For vessels of Class II the number of maunds obtained by the system of measurement prescribed for vessels of Class I, shall be increased by one-half. For vessels of this class above 5,000 maunds measurement the maundage shall be reckoned to the nearest integral multiple of 500 maunds rejecting any remainder of less than 500 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of Class II which are furnished with reliable way-bills the gross maundage of cargo shown by the way-bills may at the option of the employer of the vessel be taken as the maundage on which toll will be charged. Provided that firms or individuals who wish to make use of this rule, must be approved by the Superintending Engineer of the South-Western Circle, and that such approval may be withdrawn for any just cause.

3. Every vessel entering the canals shall be furnished with a ticket on which the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage of the vessel, the cargo it contains, the amount of toll charged, and the number of days for which the ticket remains current, shall be entered.

4. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognised standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

5. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rule 2 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section IX of the Act.

6. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of one rupee. Provided that for tickets on which the total tollage is less than four rupees, the fee to be charged for a duplicate shall be one quarter of the total tollage.

7. A vessel which has been detained under these rules or under section IX of the Act, may not be removed from the canal without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjee, owner, or agent must make arrangements for the safety of the vessel and cargo.

8. All vessels, whether the property of Government or of private owners, are liable for toll except those exempted by the provisions of Bengal Government Notification No. 261, dated the 21st July 1890.

9. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor appointed by the Lieutenant-Governor, under section XIII. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

10. At places where mooring posts have been provided by the Supervisor, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor may direct and shall not be moored in any other manner.

11. The Supervisor may by written notice to be posted at the Toll Offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the Canals or on the banks.

12. Boats shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor, and no boat shall be made fast or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety, or obstruct the passage, of other boats.

13. Boats passing through the canals shall keep in separate lines, empty boats keeping close to the bank and those that are laden in the centre.

14 In portions of the canals where only one towing path exists, vessels shall moor on the side opposite to the towing path, and the towing path side shall always be kept clear.

15. Iron built cargo boats, with outside angle irons projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the lock.

16. No fire, or open or unprotected light of any description, shall be used on boats containing petroleum, jute, hay or straw while in the Calcutta Canals or Tolly's Nala; and no fire or open or unprotected light (except in the case of steamers, the galley and engine-room fires and the electric light) shall be used on any vessel while in a lock basin.

17. No person shall wilfully or negligently allow a vessel to sink in the canals.

18. In every case of a sunken vessel whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

If three days after the occurrence of a wreck, it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner.

19. When a sunken vessel has been recovered, the Supervisor shall cause notices to be posted at the locks, toll-offices, or other prominent places, calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, under the procedure directed in section IX of the Act.

20. The purchaser of a vessel sold under the provisions of section IX of the Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

21. When any laden vessel which has sunk, has been recovered; or, when any laden vessel has been seized under the provisions of the Act, or of these rules, the Supervisor shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay, and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

22. If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in Rule 21 shall be effected by a notice exhibited in his office, and by advertisement in at least one English and one vernacular Calcutta newspaper.

23. Steamers are not allowed to tow flats or cargo boats in the Circular Canal, but may tow one flat or barge at a time astern in the New Cut Canal.

24. *Lights and signals.*—All vessels, whether travelling or moored in the Calcutta Canals or Tolly's Nala, must, between sunset and sunrise, carry a white light in a lantern on the fore-part of the vessel where it can be distinctly seen from all sides. All steam vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam vessel, whether in motion or moored, shall carry the light prescribed above.

25. *Speed of vessels.*—Every vessel proceeding through the Calcutta Canals and Tolly's Nala must, between sunset and sunrise, limit her speed to three miles per hour.

26. For any contravention of Rules 7, 11, 12, 13, 14, 16, 17, 23, 24, and 25 the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 or Rs. 5 a day for any continuing infringement.

27. No boats will be allowed to remain between the Dwarf walls of the entrance channels to the Dhappa and Chitpur Locks.

Secretary to the Board of Examiners for Pleadership and Mookhtarship.

The 16th May 1904.

Yearly Examination of Candidates for fourth grade of Accountants.

THE yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 4th and 5th July 1904, at 10-30 A.M., both days:—

SUBJECTS.

	Full marks.	Minimum pass marks.
Writing (neatness, clearness and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) the whole	60	30
Book-keeping (*b*) mercantile	100	50
Total ...	600	...

Minimum required in all papers collectively, 400.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only). The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates.

Candidates will not be examined in any of the Calcutta offices.

Th

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of Rs. 10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth), not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's hand-writing.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal, for registration, the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidate should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination, at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College, not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.

Provided that, if for any reasonable cause there is not for the time being, in the case of any mine, a manager having the qualifications above required, any competent person appointed by the owner or agent and not holding a certificate or permit granted under these rules, may act as manager until he has had an opportunity of obtaining the necessary certificate or permit under these rules, in the district wherein the mine is situated. The owner or agent shall send, without delay, to the Chief Inspector of Mines a written notice of such temporary manager's name and address and of the reason of his appointment:

Provided also that, if for any emergent cause the manager of a mine cannot attend to his duties and there is no under-manager, any competent person, whom the manager may appoint, and for whom he shall be responsible, may carry on his duties for a period not exceeding fourteen days. The manager shall, without delay, send to the Chief Inspector of Mines a written notice of any such appointment.

(2) A manager holding a second-class certificate may manage more than one mine, if the aggregate number of persons who are usually employed underground simultaneously in all the mines managed by him does not exceed 150. A manager holding a permit may not manage more than one mine.

(3) This rule shall not come into force until the , 1904.

2. If the owner or agent appoints an under-manager to assist the manager, he shall, within two months of such appointment, send a written notice thereof to the Chief Inspector of Mines. An under-manager so appointed shall have the same responsibility and be subject to the same liabilities as the manager, but his appointment shall not affect the personal responsibility or liabilities of the manager.

3. A contractor for getting mineral in a mine, or a person employed by such contractor, shall not be eligible for the post of manager or under manager.

4. Certificates under these rules shall be granted by the Local Government. They shall be of two kinds, namely, certificates of competency and certificates of service, both having the same effect; and there shall be two classes of each kind, first and second.

5. (1) Certificates of competency shall be granted on the recommendation of a Board of Examiners. The Board of Examiners shall consist of the Chief Inspector or an Inspector of Mines as *ex-officio* president, and of two technically qualified persons as members, one being an owner or manager of a mine and the other a mining engineer. These two members shall be appointed by the Governor-General in Council, each for a term of three years at a time, and they shall receive such remuneration as the Local Government may, with the sanction of the Governor-General in Council, fix.

(2) Examinations for certificates of competency shall be held at such times and places as the Local Government may direct, and full particulars regarding every examination shall be published in each issue of the local official Gazette for at least three months immediately preceding the date fixed therefor

(3) No person shall be admitted as a candidate for a first-class certificate of competency unless he has attained the age of twenty-three years and has had practical experience in a mine for at least five years to the satisfaction of the Board of Examiners:

Provided that the said period of five years may be reduced to three, if the Board of Examiners thinks fit, in the case of a candidate who produces satisfactory evidence that he has successfully passed through the curriculum of a recognised Mining School or any other course which the Local Government may declare to be equivalent thereto.

(4) No person shall be admitted as a candidate for a second-class certificate unless he has attained the age of twenty-one years, and has at least three years' practical experience in a mine, to the satisfaction of the Board of Examiners:

Provided that the said period of three years may be reduced to one, if the Board of Examiners thinks fit, in the case of a candidate who produces satisfactory evidence that he has successfully passed through the curriculum of a recognised Mining School, or any other course which the Local Government may declare to be equivalent thereto.

(5) The Board of Examiners may, from time to time, make regulations as to the conduct of examinations for certificates of competency, so, however, that in every such examination regard shall be had to such knowledge as is necessary for the practical working of coal mines in India. Except as regards examinations held before the 1904, no regulation made by the Board of Examiners under this rule shall take effect until it has been published for six months.

(6) A fee of Rs. 25 shall be charged in the case of an examination for a first-class certificate, and one of Rs. 10 in the case of an examination for a second-class certificate, of competency. These fees shall be payable in advance

6. (1) A first-class certificate of service shall be granted to any person who satisfies the Local Government that he has acted substantially for at least five years as the manager of a coal mine in India in which usually more than 150 persons have been employed below ground simultaneously:

Provided that until the , 1906, the said period of five years may be reduced to three, if the Board of Examiners think fit.

(2) A second-class certificate of service shall be granted to any person who satisfies the Local Government that he has acted substantially for at least three years as the manager of a mine in India in which usually more than 50 persons have been employed underground simultaneously, or that he has, within five years of the commencement of these rules and for a period of not less than three years, exercised functions substantially corresponding with those of a manager or under-manager in such a mine.

(3) Every application for a certificate of service shall contain particulars of the name, place, and date of birth, the place of employment, and the length and description of the previous service, of the applicant, and such a certificate may be refused, if a full and satisfactory account of the particulars aforesaid is not furnished.

(4) A fee of Rs. 10 shall be charged for a first-class, and one of Rs. 5 for a second-class, certificate of service. These fees shall be payable in advance.

7. (1) The Local Government may grant to any person holding a first-class or a second-class certificate granted under any Act for the regulation of mines for the time being in force in the United Kingdom or in a British Colony a similar certificate under these rules:

Provided that such person has furnished proof to the satisfaction of the Local Government of his identity and good personal character.

(2) A fee of Rs. 10 shall be charged for a first-class, and one of Rs. 5 for a second-class, certificate granted under this rule. These fees shall be payable in advance.

8. Permits shall be granted by and at the discretion of the Chief Inspector of Mines, and shall be signed by him. Every such permit shall remain in force for such period, not exceeding twelve months, as the Chief Inspector thinks fit, and may be cancelled with or without cause assigned, at any time, or renewed on its expiration at the discretion of that officer.

9. A register of the holders of certificates or permits granted under these rules shall be kept by the Chief Inspector of Mines.

10. Whenever any person proves to the satisfaction of the Local Government that he has, without any fault on his part, lost or been deprived of a certificate granted to him under these rules, the Local Government may, on application made by him through the Chief Inspector of Mines, and upon such terms and conditions as the Chief Inspector may determine, cause a copy of the certificate to which the applicant appears by the register to be entitled, to be made and certified by the Chief Inspector of Mines, and delivered to the applicant. The word "Duplicate" shall be stamped across every such copy, and a fee of Rs. 2 shall be charged for it and shall be payable in advance.

11. If at any time a representation is made by the Chief Inspector of Mines to the Local Government that the holder of a certificate granted under these rules is guilty of misconduct or incompetency in the discharge of his duties, or has been convicted of an offence under the Act punishable with fine which may extend to Rs. 500, or with imprisonment which may extend to three months, the Local Government may cause an enquiry to be made into the matter; and with respect to such enquiry the following provisions shall have effect, namely :—

(*a*) The enquiry shall be public, and shall be held at such place as the Local Government may appoint, and by such person as it may direct either alone or with the assistance of any assessor or assessors named by the Local Government. Such assessors shall be practical mining engineers or persons with a knowledge of the practical working of mines.

(*b*) The Local Government shall, before the commencement of the enquiry, furnish to the manager or under-manager concerned a statement of the representation on which the enquiry is instituted.

(*c*) The Local Government may appoint any person to undertake the management of the case.

(*d*) The manager or under-manager concerned may attend the enquiry, and may either conduct his case personally or be represented by any other person approved by the person or persons appointed to hold the enquiry (hereinafter referred to as "the Court").

(*e*) The Court may, if it thinks fit, require the manager or under-manager concerned to deliver up his certificate at any time before or during the enquiry, and the manager or under-manager shall be bound to comply with such requisition, unless he shows sufficient cause to the contrary to the satisfaction of the Court.

(*f*) The Court shall, on the conclusion of the enquiry, send to the Local Government a report containing a full statement of the case, together with its opinion thereon and such account of or extracts from the evidence as it may think fit; and, if it considers that the certificate of the manager or under-manager concerned should be cancelled or suspended, it shall add a recommendation to that effect.

(*g*) After considering the report and recommendation (if any) submitted under clause (*f*), the Local Government may cancel or suspend the certificate and, if it does so, the fact of such cancellation or suspension shall, if the certificate is produced, be endorsed upon it, and, if it is not produced or if at any time a duplicate has been granted under rule 10, be notified in the *Gazette of India* and in the local official Gazette.

(*h*) When a certificate is cancelled or suspended under this rule, the Chief Inspector of Mines shall record the fact in the register of certificates kept under rule 9.

(*i*) The Local Government may at any time renew or restore, on such terms and conditions as it thinks fit, any certificate cancelled or suspended under this rule.

APPENDIX B.

RULES FOR WORKING FILTER-BEDS OF WATER-WORKS IN BENGAL.

(Revised by order of the Sanitary Board, Bengal, 26th May 1896.)

1. The depth of water above the surface of the sand in a filter-bed should never be allowed to exceed two feet; care should be taken to always maintain this depth of water as long as filtration is in progress, and for this purpose gauges should be painted on the side walls of the filter-beds.

2. The water collecting in the drains of a filter-bed is usually discharged into a small masonry well called the *outlet-well*, from whence it passes through a sluice into the clear-water reservoir; the difference of level between the surface of the water in the filter-bed and that in the outlet-well is called the *filtration head;* the rough sketch in the margin explains this clearly. The *filtration head* should not under ordinary circumstances exceed *six inches*, but in cases of emergency it may be allowed to reach as much as twelve inches. Full reasons for allowing the filtration head to exceed six inches should be recorded in the filter-bed log-book.

3. The interiors of outlet-wells should be painted white, and gauges should be painted on the side walls, so that the filtration head may be accurately recorded.

4. Readings of all gauges should be taken every two hours while the filters are at work, and recorded carefully in the log-book (Sanitary Engineer's Form No. 5) or in any other form approved by the Sanitary Engineer.

5. Filter-beds should not be worked continuously, but the surface of the filtering material should be exposed to the air for at least eight hours out of the twenty-four, so as to enable the air to penetrate and so oxidize any organic matter deposited in the interstices of the filtering material by the unfiltered water. Filter-beds should, preferably, be run dry at night time only.

6. Filter-beds should *not* be charged from below or by admitting water upwards on to the surface of the sand. When a filter-bed is to be brought into work, the outlet valve should be kept closed until the depth of water on top of the sand remains at the limit prescribed in rule 1, *i.e.*, two feet, care should be taken not to disturb the surface of the sand by admitting water too rapidly at first.

7. Sand that has been scraped from the surfaces of filter-beds should be left exposed to the air for six or seven days before it is washed and replaced in the filter-beds.

8. The fine sand in a filter-bed should never be reduced by scraping to a less depth than 12 inches. When sand washers are available, the fine sand should be brought up to its correct thickness after every third scraping, so that the rate of flow through the filtering material may be kept as uniform as possible.

9. The filtering material and brick drains should be entirely removed from the filter basin once every four years. The pebbles, or broken stone, and the coarse sand may be replaced, provided they have been thoroughly exposed to the air while the brick drains are being laid; they should be spread out in thin layers and turned over with spades at least once a day. The fine sand should be entirely renewed. When a filter-bed has been reconstructed and charged, the filtered water flowing from it should be allowed to run to waste for at least 48 hours.

10. Water should not be allowed to remain in settling tanks longer than is necessary for the deposition of suspended mineral matter, such as clay, sand, etc. Whenever the water of the source of supply is sufficiently clear, it may be pumped direct into the filter-beds, or if the intermittent character of the flow causes damage to the surface of the filtering material, the water may be passed through the settling tanks at a low level without being allowed to stagnate.

RED SEA, WESTERN SHORE—Asab bay.

Rubattino channel—Leading beacons removed.

No. 146 (second publication).—The British Admiralty has given notice (No. 249 of 1904) that, in consequence of the alteration which has taken place in the depths in Rubattino channel, Asab bay, the leading beacons erected on the small islet between Huiheb and Haleb islands have been removed.

PACIFIC OCEAN, SOUTH—Royal Company's islands.

Non-existence of, reported.

No. 147 (second publication).—The British Admiralty has given notice (No. 252 of 1904) that on old Charts of the South Pacific ocean, in the area south of Australia, a group of islands, named Royal Company's islands, are marked as existing in lat. 50° 20′ S, long. 143° 0′ E. They have consequently been inserted for many years in the Admiralty publications.

These islands are not mentioned in any Sailing Directions, the original report of their existence cannot be traced, nor have they apparently been seen by any passing vessel.

Since 1890 the Hydrographic Department of the Admiralty has been collecting data showing where ice and icebergs may be met with in the Southern oceans, and this has necessitated plotting the tracks of many vessels passing south of Australia, several of which have passed over, or close to, the position assigned to the Royal Company's islands without seeing them or any sign of land near them:—thus in 1892 the *Pakeha* passed one mile north of their assigned position; in 1893 the *Crusader* passed 5 miles north of them; in 1894 the *Rangatira* passed 15 miles north of them; in 1895 the *Maori* passed 2½ miles south, and the *Rangatira* 15 miles south of them; in 1899 the *Rangatira* passed one mile south of them, and the *Matatua* 2 miles north; in 1900 the *Matatua* passed over the position in which they are supposed to be situated; in 1901 the *Karamea* passed 40 miles south of them, and in 1902 the *Pakeha* passed 12 miles south of them.

As no certain information is available as to why these islands were originally placed on the Charts, and as it is evident from the tracks plotted that no land exists in the locality in which they are marked on the Charts, they have now been expunged from the Admiralty publications.

This Notice affects the following Admiralty Charts:—Atlantic and Indian oceans, etc. No. 2483; Pacific ocean, Nos. 2683 and 788.

AUSTRALIA, WEST—Geographe bay.

Cape Naturaliste—Light established.

No. 148 (second publication).—With reference to Notice to Mariners No. 356, dated 31st October 1903, issued by this office, the British Admiralty has given further Notice (No. 253 of 1904) that, on 15th April 1904, a *white group flashing* dioptric light showing groups of two flashes *every ten seconds*, thus:—flash, *one-tenth of a second*, eclipse, *two and six-tenths of a second*, flash, *one-tenth of a second*, eclipse, *seven and two-tenths of a second*, will be established in a grey stone tower, 62 feet high, constructed in a position about a mile S. 67° E. from the extremity of cape Naturaliste. The light will be elevated 404 feet above high water and visible in clear weather from a distance of 29 miles; it will be obscured over the land from the bearing of N. 20° E., through north, to N. 63° W.

Approximate position, lat. 33° 32′ S., long. 115° 2½′ E.

No. 149 (second publication).—The British Admiralty has given notice (No. 254 of 1904) that it is intended to make the undermentioned alteration in the lighting of the Massawa channel:—

1. Difnein island. The white fixed light on this island will be replaced by a *white flashing* light *every five seconds*, with a *red* sector, exhibited from an iron tower 114 feet high.

   Approximate position, lat. 16° 37′ N., long. 39° 18½′ E.

2. Madote island. A *white fixed* light, visible from a distance of 10 miles, will be established on a framework support, 35 feet high, now being constructed on this island.

   Approximate position, lat. 15° 35′ N., long. 39° 44½′ E.

3. Shumma island. The white fixed light on this island will be increased in power, and be visible from a distance of 16 miles; it will be established on an iron tower 72 feet high.

NEW ZEALAND—North island, west coast.

Kaipara bar—Channel altered.

No. 150 (second publication).—The British Admiralty has given notice (No. 257 of 1904) that the black and white beacons on North sand spit, Kaipara harbour, in line, now lead over the shoalest part of the bar, they will therefore be removed.

A new channel half a mile wide, in which there are depths ranging from 4¼ to 7 fathoms at low water, has opened out through North spit; it is intended to erect leading beacons to mark this channel, but in the meantime it may be used by keeping a large grassy patch (the only one in the vicinity), situated about six-tenths of a cable S 22° E. from the lighthouse, in line with the lighthouse flagstaff N. 52° E.; this will lead through the new channel in a depth of not less than 4¼ fathoms at low-water ordinary springs. The soundings being irregular the sea will probably break heavily in westerly gales in this channel.

RESOLUTION RECORDED ON THE ANNUAL RETURNS OF THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1903

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 12th May 1904.

RESOLUTION No. 577T.—M.

READ—

The Annual Returns of the Lunatic Asylums in Bengal for the year 1903.

Read also—

The Triennial Report on the working of the Lunatic Asylums in Bengal for the three years 1900—1902 and the Resolution recorded by Government thereon.

The returns, which were received by the Government before the prescribed date, have been prepared in accordance with the instructions contained in the Resolution of the Government of India in the Home Department, No. 21—31, dated the 12th January 1904.

2. The Inspector-General of Civil Hospitals points out in the notes that the number of new admissions, the daily average population, and the total number treated were the highest on record, and he suggests that lunatics are brought into the Asylums more frequently and freely than in

former years. The increase between the years referred to by him is, however, not greater than is accounted for by the increase in the total population of the Province. Attention is also drawn to the fact that the death-rate is higher in Bengal than in some other Provinces. The explanation no doubt is that the total capacity of the Asylums in Bengal is smaller in proportion to the total population of the Province than that provided elsewhere; for when only a smaller proportion of the lunatics can be treated preference must be given to the worst cases, and among these naturally there is a larger mortality. The average number of inmates per 1,000 of population was ·01* in Bengal as compared with ·051 in Bombay,* ·051 in Burmah, and ·023 in the Punjab. The same explanation probably accounts for the large number discharged as cured in Bengal, which was 96·44 per mille against 66·41 in Bombay, 80·83 in Burmah, and 70·18 in the Punjab. The daily average number of inmates in Bengal was 1,053·70, while the capacity of the Asylums was only 1,188.

* Figures for other Provinces are from Reports for 1902, except those for the United Provinces, which are for 1901.

3. The Inspector-General of Civil Hospitals points out that the most serious item in expenditure is the cost of diet. This has increased considerably more in recent years than either the rise in prices or the larger average population appears to account for. In the five years ending in 1892 the average cost per patient for diet was Rs. 33-13-1, but in the year under review it had risen to Rs. 47-11-6, or by 41·11 per cent. In the different Asylums the percentage of increase was as follows:—Dullunda 32·60, Dacca 15·02, Patna 31·18, Berhampore 18·34, and Cuttack 12·21. An explanation should be obtained of the large increase in the last-named Asylum. Figures for this comparison are not available for Bhawanipur. On the other hand, if the comparison be made with the quinquennial period ending with 1902, it will be found that there has been an actual decrease, the total cost of diet in the year 1903 having been less than in the year 1902 and almost the same as in the year 1901. It is also satisfactory to note that the average total cost per patient in Bengal (Rs. 130) is less than in Bombay (Rs. 174), Madras (Rs. 172), the Punjab (Rs. 166), or Burmah (Rs. 149), although it considerably exceeds the figure shown for the United Provinces (Rs. 95).

4. It is undeniable that the arrangements at the Asylums are in many respects far below the standard of the present day. Especially is this the case in Bhawanipur, where the patients are shut in, and where their surroundings are not conducive to successful treatment. At other Asylums also, although more space is available, there is an absence of the skilled supervision which can only be obtained by the continuous presence of a highly trained specialist. To render it possible to provide such treatment at a reasonable cost concentration of these Asylums is necessary, and such a measure has become practicable owing to the fact that almost all districts are now accessible by railway. The arrangements for carrying out this reform are already far advanced in the case of native lunatics; and it is hoped that it may be found feasible to carry out a similar reform in the case of European lunatics: the matter is receiving earnest attention. Although, however, the medical officers in charge have had to work under great disadvantages, the Lieutenant-Governor notices with much satisfaction the opinion recorded by the Inspector-General of Civil Hospitals that the Asylums have been carefully and judiciously managed throughout the year.

By order of the Lieutenant-Governor of Bengal,

L. P. SHIRRES,

Secretary to the Government of Bengal.

FINAL FORECAST OF THE WHEAT CROP OF BENGAL, 1903-1904.

The 16th May 1904.—The following is published for general information.

A. EARLE,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Forecast of the Wheat crop of Bengal, 1903-1904.

Preliminary.—Wheat is grown chiefly in the Bihar districts; also in Murshidabad, Nadia, Rajshahi, Rangpur, Pabna, Hazaribagh, and Palamau.

2. *Character of the season.*—The heavy rains in October favoured the retention of moisture by the soil during the wheat-growing season. In November light showers were obtained all over the Province, except in Bihar, where, however, the bulk of the wheat crop is raised. December was practically rainless, but the crop in Bihar was much benefited by the January rains. In February the rainfall was more general and copious. On the whole, the season has been moderately favourable.

3. *Area sown.*—The normal area under wheat in these Provinces is at present estimated at 1,498,500 acres, while the area planted this year is returned at 1,508,600 acres, against 1,117,000 acres sown last year.

4. *Character of the crop.*—From Appendix I, in which the district returns have been summarised, it will be seen that out the nineteen large wheat-growing districts in the Province, only Patna reports a crop of over 100 per cent. Five districts, viz., Rajshahi, Pabna, Gaya, Saran, and Malda report a normal crop of 100 per cent. Monghyr and the Sonthal Parganas expect a 95 and a 98 per cent. crop respectively. In four districts (viz., Shahabad, Darbhanga, Purnea, and Hazaribagh) the outturn varies between 80 to 86 per cent., and in the remaining seven it varies between 60 to 78 per cent. Since the publication of the preliminary forecast in February last prospects improved in five districts out of the nineteen chief wheat-growing districts, remained stationary in six and deteriorated in eight. The provincial outturn according to the present estimate of the District Officers amounts to 85 per cent., of a normal crop, against 89, which was their estimate in the Preliminary Forecast.

Considering the favourable condition of the season, the provincial outturn may safely be estimated at 90 per cent. of a normal crop.

5. *Food-stocks and the prices of food-grains.*—The harvests of the year are generally reported to be a little below the normal, but the prices were easier than in the previous year. This may be partly ascribed to sufficient stock left from the harvest of the previous year, but I would ascribe it mainly to better harvests actually obtained. The stock in hand, though not plentiful, is sufficient for the requirements of the Province.

6. *Gross outturn.*—According to the estimates of the District Officers, the gross yield of wheat in the Province will, this year, amount to 527,800 tons, as compared with 485,900 tons of the past year.

7. *Imports of wheat into Calcutta.*—From the statistics of the wheat trade quoted on the margin, it will be noticed that there was during the year under report a considerable decrease of imports of wheat into Calcutta from Bengal and Bihar. This is probably due to good crops in other Provinces of India, and consequent less demand from these Provinces.

Imports of wheat into Calcutta from the calender year 1891 to 1901.

FINAL FORECAST ON THE OILSEED CROPS OF BENGAL, 1903-1904.

The 16th May 1904.—The following note is published for general information.

A. EARLE,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final forecast of the Oilseed Crops of Bengal, 1903-1904.

Explanatory.—This forecast furnishes the final estimates of the area and outturn of the different kinds of oilseeds, both *bhadoi* and *rabi*, grown in these Provinces. The chief oilseed crops are mustard (white and brown) and rape, sesamum (*til*), linseed, castor, Niger oilseed (*sirguja*), and *eruca sativa* (*tárámani*). Mustard and rape occupy about 50 per cent. of the total area under oilseeds, and linseed occupies about 25 per cent. The bulk of the mustard and rape is cultivated in the districts of the Rajshahi Division, in Dacca, Mymensingh, Purnea, and the Sonthal Parganas. Linseed is chiefly grown in Darbhanga, Saran, Champaran, Gaya, and Nadia. *Til* or ginjelly is grown principally in Jessore, Bogra, Pabna, Dacca, Mymensingh, Backergunge, Tippera, Noakhali, Midnapore, Gaya, Angul, Hazaribagh, and Palamau.

2. *Character of the season.*—The heavy rainfall of October has been reported to have injuriously affected the *rabi* oilseed crops in some districts, while in some others it is reported to have helped the retention of moisture by the soil and done much good to these crops. Probably where sowing of mustard and linseed had been done before these heavy rains, the crops have been damaged and resowing may have been found necessary, but, on the whole, I should say that the heavy rains benefited both the *bhadoi* and the *rabi* oilseed crops. These were followed by only light showers in November, except in the Patna and Bhagalpur Divisions, where, owing to want of rain in November and December, the crops have suffered. Throughout Bihar and North Bengal, however, light showers were obtained in January, and in February the showers throughout the Province were fairly copious. March and April were practically rainless; but this only facilitated harvest operations. I do not see much ground for concluding that weather conditions were worse

since the preliminary forecast, and, on the whole, the season was favourable for the *rabi* crops.

3. *Area sown.*—The total normal area under different oilseed crops is now estimated at 3,878,900 acres. The area cropped in the current year is returned at 3,829,500 against 3,657,700 acres sown last year.

4. *Character of the crop.*—It will be seen from Appendix I, that six districts, viz., Dinajpur, Pabna, Dacca, Gaya, Purnea, and Malda have reported a normal crop; 14 districts 90 to 99 per cent.; 14 other districts 80 to 89 per cent.; 10 districts 60 to 69 per cent., and Nadia 58 per cent. According to the district estimates, the outturn of the Province, as a whole, amounts to 84 per cent. of an average crop, against 90 per cent., which was the return in the preliminary forecast. As conditions improved since January, I regard the present estimate as unduly low, and I do not think the outturn for the Province, as a whole, will fall below 90 per cent.

5. *Gross outturn.*—Taking 6 maunds per acre to be the normal rate of outturn for linseed, rape and mustard, and 4¼ maunds per acre for other oilseeds, the gross yield of all the oilseed crops for these Provinces during 1903-1904 amounts to 663,600 tons against 609,700 tons produced in the preceding year.

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE MONTH OF APRIL 1904.

At the beginning of the month pressure was practically normal over the whole Province while temperature was everywhere above the normal. On the 1st a fall of the barometer set in in the west, and extended over the whole Province on the following day. Though the downward course was checked on the 3rd, it was resumed with increasing rapidity on the 4th, 5th, and 6th; the defect from the normal on the latter date amounting at approximately $\frac{3}{10}$ths of an inch in the south of the Province. An equally sharp recovery on the two succeeding days had the effect of re-establishing normal conditions, so that on the morning of the 8th pressure was not far removed from the average, there being slight excess over the northern and eastern portions of the Province and slight defect over the remainder. At the beginning of this period fresh southerly winds had set in at the head of the Bay, and gathering force from day to day were causing a strong indraught of moisture into the eastern and northern parts of the Province. Rainfall, which at the end of March had been isolated and confined to Assam, began about the 4th of April—favoured as it was in addition by the fall of the barometer which then set in—to extend to the eastern and northern parts of the Province. This strong indraught was no doubt due mainly to the high day temperatures prevailing in the western interior, which caused a sharp gradient of pressure from the head of the Bay to the west of the Province. From the 8th to the 16th pressure, with only a small check on the 12th and 13th, fell steadily. The defect on the 16th was everywhere large, and amounted in some places to $\frac{1}{4}$th of an inch. Day temperatures in the west of the Province remained steadily high and largely above the average—conditions which fostered the formation of an area of unusually low pressure in that quarter and the continued powerful indraught of humid air from the Bay into the eastern and northern parts of the Province. On the other hand, in the west and south-west comparatively dry westerly winds were blowing steadily during this period. In consequence of this circulation, rainy weather prevailed during almost the whole period in Assam and East Bengal and to a large extent in North Bengal as well. The only days on which the showery weather extended to the remaining parts of the Province were the 8th and 9th, but the showers which then fell in these parts were for the most part insignificant. It may be noticed with respect to the temperature during this period that although the day temperatures naturally fell in the parts affected by the rainfall, the mean remained for the most part above the normal, chiefly owing to comparatively high night temperatures. On the 16th a marked change in the conditions took place, a sharp general rise of the barometer commencing on that date and continuing for the next few days. Owing to this rise pressure was nearly normal on the 19th, and continued so with slight fluctuations till the 22nd. During this period of rise day temperatures had fallen in Bihar and Chota Nagpur, and the winds at the head of the Bay had diminished in force. Rainfall consequently decreased, the 16th and 17th being the only days of the month with the exception of those at the beginning on which the whole Province was free from rain. From the 18th, however, onward day temperatures on the west of the Province again began to increase, and in response to this rise a corresponding access of strength was noticeable in the winds at the head of the Bay. Showery weather in consequence once more gradually established itself in Assam and the northern and eastern portions of the Province. Temperature during the first days of this period fluctuated in the north and east portions of the Province, but towards the end began to fall, so that on the 22nd it was in general defect. From the 22nd to the 27th a moderate surge of pressure took place, a considerable fall being followed by a still more considerable rise, with the result that on the latter date pressure was in moderate excess over the Province. During this period the distribution of pressure was not so favourable as it had been for the indraught of moist winds from the Bay. Though temperature still continued excessive in the west, the day temperature had risen in the north as well, so that winds over the Province were more southerly. Rainfall consequently almost ceased in East Bengal, though it still continued in North Bengal and Assam. During the last days of the month the character of the weather did not change materially. On the 28th a fall of pressure set in and continued on the next day. A slight recovery on the 30th resulted in the pressure on that day being nearly normal with a slight excess in the eastern and a slight defect in the western half. The distribution again became more favourable for rainfall in Assam and the northern and eastern portions of the Province, and precipitation consequently increased again. During the latter as well as the former half of the month, the conditions were such as to practically confine the rainfall to Assam and the last mentioned parts of Bengal.

General summary of weather.—The weather during the month was characterised by great uniformity. With almost constant high day temperatures in South Bihar and Chota Nagpur a persistent area of low pressure maintained itself in that quarter, causing a very strong indraught of humid air from the Bay with a circulation giving south-west winds in the south-west portions of the Province, while over East and North Bengal and Assam the directions curved from south through south-east and east to north-east. Owing to the persistence of these conditions during the greater part of the month the winds at the head of the Bay were largely above normal strength, while the rainfall, copious in Assam and the northern and eastern parts, was extremely scanty over the remainder of the Province.

Summary of pressure.—Pressure was nearly normal both on the first day and on the last day of the month. Between these dates there were four marked oscillations of pressure, the first two showing an amplitude much greater than is usual. Though, however, pressure recovered at the end of the month to very nearly its original phase, the long period of falling barometer, from the 7th to the 16th, brought the mean pressure of the month below the normal, and caused a defect over the whole area, varying from a minimum of $\frac{3}{1000}$ in Burmah to $\frac{80}{1000}$ in South-West Bengal.

Summary of temperature.—The conditions noted in the report indicate an excessive maximum temperature in the western half of the Province, enduring almost continuously for the whole month. This excess extended also to the night temperatures. On the other hand, as soon as the showery and cloudy weather had established itself in the eastern half, day temperatures naturally fell, while the humidity of the atmosphere helped to maintain the minima at a level above the normal, which was, however, counteracted to a certain extent by the low minima which occurred when rain actually fell during the night. The general result is that while mean maxima are in excess in the western half and in defect in the eastern half of the Province, mean minima are above the normal over the whole Province, the excess, however, diminishing to zero as we approach the extreme east and north-east of the Province.

Summary of rainfall.—As already noted, rainfall was very scanty in the south-west and western parts of the Province, being considerably below the normal in South-West Bengal, Chota Nagpur, Orissa, and Bihar, while rainfall was very considerably in excess in North and East Bengal and Assam. The conditions prevailing in normal years are of course always such as to induce a much larger precipitation in the latter than in the former divisions of the Province, but in the present year these conditions were strikingly exaggerated, leading to the marked contrast above noted between the rainfall in the eastern and western halves of the Province.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of April 1904:—

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

Revised Rules for the Calcutta Canals and Tolly's Nala.

The rules shall apply to the following navigable channels which are included under the designation "Calcutta Canals and Tolly's Nala":—

I.—The Circular Canal comprising the still-water canal between the Dhappa and Chitpur Locks and the New Cut Canal from Ultadingi to Dhappa Lock, together with its junction with the river Hooghly and the Orange Soorah at Dhappa.

II.—The Central Lake Channel from its junction with the Circular Canal at the Dhappa Lock to its junction with the Biddiadharee at Bamunghatta.

III.—The Nowbhanga khal, extending northwards for a mile from its junction with the Central Lake Channel below the Dhappa Lock.

IV.—The Soorah from its junction with the Central Lake Channel below the Dhappa Lock and extending to the fish market situated adjacent to, and to the west of, the Dhappa Inspector's residence.

V.—Tolly's Nala extending from a line drawn across the Nala 25 feet west of the Hastings Bridge at Kidderpore to the Biddiadharee river at Samookpota.

1. Every vessel on entering the Calcutta Canals or Tolly's Nala shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, the persons appointed by the Lieutenant-Governor to collect tolls and officers to whom such persons are subordinate shall have authority to again measure a vessel notwithstanding that it was measured on entering the canals.

2. Vessels for the purposes of the determination of tonnage shall be divided into two classes as below:—

Class I.—To include all vessels of the usual native types of build.

Class II.—To include all steamers, flats and barges, and other square built boats.

The net tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V (B.C.) of 1864 and of these rules, be determined by the following measurements:—

Class I.—

A.—The product of one quarter the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length is to be made in feet, rejecting inches; the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of boats exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—Provided that in the case of vessels which enter the canals at Chitpore, Kidderpore and Chetla empty, for the purpose of loading therein, the depth shall be measured from the line of usual immersion when fully loaded as visible on the outside of the vessel to the bottom (interior) of the vessel, and not from the line of actual immersion at the time of measurement.

Class II.—

For vessels of Class II the number of maunds obtained by the system of measurement prescribed for vessels of Class I, shall be increased by one-half. For vessels of this class above 5,000 maunds measurement the maundage shall be reckoned to the nearest integral multiple of 500 maunds rejecting any remainder of less than 500 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of Class II which are furnished with reliable way-bills the gross maundage of cargo shown by the way-bills may at the option of the employer of the vessel be taken as the maundage on which toll will be charged. Provided that firms or individuals who wish to make use of this rule, must be approved by the Superintending Engineer of the South-Western Circle, and that such approval may be withdrawn for any just cause.

3. Every vessel entering the canals shall be furnished with a ticket on which the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage of the vessel, the cargo it contains, the amount of toll charged, and the number of days for which the ticket remains current, shall be entered.

4. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognised standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

5. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rule 2 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section IX of the Act.

6. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of one rupee. Provided that for tickets on which the total tollage is less than four rupees, the fee to be charged for a duplicate shall be one quarter of the total tollage.

7. A vessel which has been detained under these rules or under section IX of the Act, may not be removed from the canal without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjee, owner, or agent must make arrangements for the safety of the vessel and cargo.

8. All vessels, whether the property of Government or of private owners, are liable for toll except those exempted by the provisions of Bengal Government Notification No. 261, dated the 21st July 1890.

9. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor appointed by the Lieutenant-Governor, under section XIII. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

10. At places where mooring posts have been provided by the Supervisor, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor may direct and shall not be moored in any other manner.

11. The Supervisor may by written notice to be posted at the Toll Offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the Canals or on the banks.

12. Boats shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor, and no boat shall be made fast or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety, or obstruct the passage, of other boats.

13. Boats passing through the canals shall keep in separate lines, empty boats keeping close to the bank and those that are laden in the centre.

14 In portions of the canals where only one towing path exists, vessels shall moor on the side opposite to the towing path, and the towing path side shall always be kept clear.

15. Iron built cargo boats, with outside angle irons projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the lock.

16. No fire, or open or unprotected light of any description, shall be used on boats containing petroleum, jute, hay or straw while in the Calcutta Canals or Tolly's Nala; and no fire or open or unprotected light (except in the case of steamers, the galley and engine-room fires and the electric light) shall be used on any vessel while in a lock basin.

17. No person shall wilfully or negligently allow a vessel to sink in the canals.

18 In every case of a sunken vessel whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

If three days after the occurrence of a wreck, it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner.

19. When a sunken vessel has been recovered, the Supervisor shall cause notices to be posted at the locks, toll-offices, or other prominent places, calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, under the procedure directed in section IX of the Act.

20. The purchaser of a vessel sold under the provisions of section IX of the Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

21. When any laden vessel which has sunk, has been recovered; or, when any laden vessel has been seized under the provisions of the Act, or of these rules, the Supervisor shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay, and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

22. If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in Rule 21 shall be effected by a notice exhibited in his office, and by advertisement in at least one English and one vernacular Calcutta newspaper.

23. Steamers are not allowed to tow flats or cargo boats in the Circular Canal, but may tow one flat or barge at a time astern in the New Cut Canal.

24. *Lights and signals.*—All vessels, whether travelling or moored in the Calcutta Canals or Tolly's Nala, must, between sunset and sunrise, carry a white light in a lantern on the fore-part of the vessel where it can be distinctly seen from all sides. All steam vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam vessel, whether in motion or moored, shall carry the light prescribed above.

25. *Speed of vessels.*—Every vessel proceeding through the Calcutta Canals and Tolly's Nala must, between sunset and sunrise, limit her speed to three miles per hour.

26. For any contravention of Rules 7, 11, 12, 13, 14, 16, 17, 23, 24, and 25 the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 or Rs. 5 a day for any continuing infringement.

27. No boats will be allowed to remain between the Dwarf walls of the entrance channels to the Dhappa and Chitpur Locks.

"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only). The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination may make his own arrangements in regard to the *place* and *hour* of examination with the candidates

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government

2. The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of Rs. 10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth), not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's hand-writing.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal, for registration, the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidate should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination, at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College, not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.
